## Special Issue on mineral deposits in the Urals

### SCOPE of the Special Issue

The aim of the Special Issue entitled “**An overview of mineral deposits in the Urals**” will be to bring to light the state of progress in knowledge of metallogeny of the Uralian orogen, one of the World’s major metal producing regions.

This issue will be focused on reviewing major types of mineral deposits of the Urals, i.e. VHMS, iron skarn, platinum, manganese, orogenic gold, Cu-porphyry, etc., with a focus on their classification, distribution as well as on genetic features of key mineral deposits.

### Submission Guidelines

All submitted papers must be clearly written in excellent English and contain only original work, which has not been published by or is currently under review for any other journal or conference. All papers will be peer-reviewed by independent reviewers. Requests for additional information should be addressed to the guest editors.

Author guidelines for preparation of manuscript can be found at

<http://www.elsevier.com/journals/ore-geology-reviews/0169-1368/guide-for-authors>

Papers should be submitted via the EES application that can be found at

<http://ees.elsevier.com/orgeo>

To ensure that all manuscripts are correctly identified for consideration for this special issue, it is important that authors select **Urals deposits** as the ‘**Article Type Name**’ during the submission process.
