

MRK²⁰¹⁶

EMU School on **M**ineral **R**eaction **K**inetics
19 - 23 September 2016, Vienna

EUROPEAN
MINERALOGICAL
UNION

MRK²⁰¹⁶ is a school on "Mineral reaction kinetics: microstructures, textures, chemical and isotopic signatures" that will be held within the framework of the EMU schools program. In this school a team of internationally recognized researchers will gather to share their expertise, experience and enthusiasm for an integrated approach to deciphering mineral reaction kinetics. A new volume on this topic will be available for the school as part of the series of EMU Notes in Mineralogy.

The MRK²⁰¹⁶ school is a satellite event of the 2nd European Mineralogical Conference EMC²⁰¹⁶, which will be held in Rimini, Italy from 11 – 17 September 2016. A topical session on "Mineral reaction kinetics" at this conference will bring together active researchers from all over the world.

The school will be organised by Rainer Abart (University of Vienna) and Wilhelm Heinrich (GFZ Potsdam) and will take place at the University of Vienna from 19 – 23 September 2016.
