## *Dear colleagues!*

The Department of Mineralogy, Crystallography and Petrology and the Faculty for Geological Prospecting of the St. Petersburg Mining Institute (Technical University) cordially invite you to attend the international scientific conference "Fedorov Session 2008" to be held in St. Petersburg from October 8<sup>th</sup> to 10<sup>th</sup>, 2008. The aim of the Fedorov Session 2008 is to discuss recent progress and future trends in crystallography, mineralogy and petrography within the directions of works established by Prof. Evgraf Fedorov (1853-1919).

### **Scientific Sessions.**

#### 1. Real structure of minerals and rocks: Insight in formation processes.

Processes of formation and transformation of minerals and rocks, indicators of genesis. Constitution of minerals and rocks as a constraint for their origin.

#### 2. Mineralogical crystallography and crystal chemistry.

New data on descriptive studies and modeling of crystal substance.

#### 3. Applied mineralogy.

Mineralogical methods applied to geology, gemology, materials science, biology and other fields of science and technology.

#### 4. History of science.

This traditional session is dedicated to anniversaries of the year.

**Official languages:** Russian and English.

**Presentation forms:** plenary lecture (40 minutes), general presentation (15-20 minutes), poster presentation. Extramural participation is possible (abstract publication only). Invited plenary lectures and extended abstracts (up to 5 pages) will be presented by the winners of the Russian Mineralogical Society Outstanding Young Researcher Awards 2007 (for Russian and non-Russian researchers).

**The organization fee will not be raised.** The set of information materials (Scientific Programme and Proceedings Volume) **will be afforded only to the intramural participants personally registered on the official website of the conference** ([www.minsoc.ru/FS2008/](http://www.minsoc.ru/FS2008/)).
